LibrariesNI Public WiFi Instructions for iOS Devices

This guide provides general guidance upon how to connect iOS devices to the LibrariesNI public WiFi service and how to use the WiFi web based print service.

Please note that if you do encounter any issues when connecting to the WiFi Service, then it’s recommended that you refer to the manufacturer’s instructions for connecting your particular device to a wireless network.

How to connect to the LibrariesNI WiFi Service

1. Go to Settings > Wi-Fi and connect to the appropriate WiFi network for your age:

   - LNI-Public-Child
     - If you are under 16 years old
   - LNI-Public-Adult
     - If you are 16 years old or above

2. After a few seconds you should automatically be redirected to the LibrariesNI WiFi service login page. Enter your membership ID number and PIN code and select Login:
3. If login was successful then you’ll see the following screen. Once logged in successfully select done.

**User Authenticated**

In 10 seconds you will be automatically redirected to http://www.google.com/.

Click here to go there directly.

Click here to bookmark this page.

4. You’re should now be connected to the LibrariesNI WiFi service. To browse the Internet open up Safari.

5. Please note when you try to load secure websites which have a web address starting with HTTPS, you will be prompted every time with a warning page and you have to click on “Continue” to access these web pages. In order to stop this happening every time, you can install a security certificate which will remove this message. Instructions on how to bypass this message are shown below.

**How to install the LibrariesNI Certificate for viewing secure (HTTPS) websites**

Please note that when you first start to use the Public WiFi service you’ll be requested to select continue every time you access a secure HTTPS webpage. This is because the LibrariesNI Internet proxy service uses its own certificate to inspect any SSL web traffic. To prevent you having to select continue each time, if supported by your device you can download and then install the LibrarieNI proxy service certificate into your device trusted certificate store. The LibrariesNI proxy service certificate can be downloaded from the following website: http://www.librariesni.org.uk/Pages/LibrariesNI-Wifi-Instructions.aspx

Please refer to the Apples instructions upon how to install certificates within the version of iOS which runs on your device.
How to Print when using the LibrariesNI WiFi service

1. Once you’ve connected and logged into the LibrariesNI WiFi service, to use the print service you’ll need to install the PaperCut iOS app. This app only needs to be installed once and will be available the next time you use the LibrariesNI WiFi service. To install the app, open the Safari web browser and go to the following url address: http://webprint.lni.net:9191/ios/install. After accessing the installation URL on an iPad or iPhone (iOS device) an Install Profile dialog should appear. Follow the prompts to install the App. Once complete a Printing App should be available on the home screen.

2. Now that the Papercut iOS App is installed you can now print to library printers from your device. To do this, go into the appropriate application and select Print. Select the appropriate colour or Black and White print queue for your library branch and then select print. E.g. Belfast-1st-BlackandWhite

3. To accept the cost of the print job and to submit the job, open up the PaperCut App on the Home Page and then login using your membership ID and PIN code.
4. Once logged in to the PaperCut App you’ll be provided with a prompt showing the cost for the submitted print request and you’ll be given the option to either Print or Cancel the request. If you wish to proceed with the printing job, select Print and then go to the front desk to pay for and collect your printout.
